

VA NEC NX ULTRASOUND GUIDED FUSION BIOPSY SYSTEM CONTRACT

FOUR POINTS TECHNOLOGY AND PHILIPS HEALTHCARE

Four Points Technology has been serving its US Federal customers for over two decades, aligning technology solutions to customer needs. As an SBA-certified Service-Disabled Veteran-Owned Small Business (SDVOSB) Value-Added Reseller, Four Points Technology provides its customers with leading edge IT and clinical solutions.

Philips Healthcare solutions are designed to help customers provide the right care at the right time in the right place. With Philips early detection and intervention offerings, clinicians put patient safety at the core of care and spend more time interacting with patients.

Four Points Technology, in partnership with Philips Healthcare, is pleased to provide the Ultrasound Guided Fusion Biopsy System solution to the Department of Veterans Affairs.

NX EQ ULTRASOUND GUIDED FUSION BIOPSY SYSTEM FOR THE VA

The Ultrasound Guided Fusion Biopsy System is an image-guided computer-aided stereotactic surgical system designed to aid in the performance of minimally invasive biopsy procedures by combining medical imaging, dedicated computer software, and surgical instrument tracking systems for guidance.

The systems provide surgeons with real-time, three-dimensional (3D) positioning and orientation of surgical instruments relative to the patient's anatomy on a video display during the biopsy without the use of an endoscope. One or more imaging modalities, such as computed tomography (CT) and/or magnetic resonance imaging (MRI), may be used in the procedure.

PHILIPS' GUIDED FUSION BIOPSY

This contract includes a variety of products specific to the Philips' Guided Fusion Biopsy System solution set. Below is a general overview of some of the products available to the Department of Veterans Affairs. For full product and price lists, please reach out to the Four Points Technology POC.

- UroNav 4 Fusion Biopsy System, Software and Upgrade Options
- UroNav Freehand Transperineal Biopsy System
- UroNav Transperineal Biopsy System
- UroNav Consumables
- DynaCAD 5 Breast and Prostate System and Software
- DynaCAD for Urology System & Software
- Rack or Tower Server Hardware
- Invivo Solutions Services

PHILIPS

VA NEC NX ULTRASOUND GUIDED FUSION BIOPSY SYSTEM CONTRACT

THE VA ORDERING PROCESS:

1. Fill out a VA Request Form (Form 2237)
2. Contact the Four Points Technology POC (Dan Mannion) for a Quote
3. Send both Form 2237 and the Four Points Technology Quote to the National Ordering Officer Team
4. Following Local approval, the VAMC will submit a funded delivery order through the VA NEC Ordering Portal.

Note - the following items are required when VAMC creates the delivery order:

- Electronic Equipment Request (EER) number
 - Funding availability
 - Requested/required items are on an existing NEC contract
5. An Ordering Officer team member will review the delivery order for accuracy against the contract and then sign and submit the order to Four Points Technology on the facility's behalf.
 - The order will be submitted to Four Points Technology within 48 hours of the initial request.
 - Orders that exceed the Ordering Officer's appointment are coordinated with the SAC Contracting Officer for additional review prior to sending to the contractor (contact information listed below).
 6. Four Points Technology will acknowledge the order by replying all that the order was received and is in process.
 7. The Ordering Officer Team will continue to work with Four Points Technology and monitor the status of delivery.
