What will my bill look like from Four Points?

Your basic bill consists of an invoice for the amount due for the prior month's usage. Format and submission method is tailored to your institution's requirements. Most institutions request, and Four Points provides, a backup report showing the breakdown of the charges by member account, service type, etc. Additionally, institutions have access to all AWS-provided cost management and tracking tools to further understand monthly charges. Depending on the governance policies of your organization, individual AWS users may have access to these native cost management and tracking tools.
